

## New Environmental Health training

**On Monday, 24 October 2016, NPW piloted new environmental health training.**

Led by NPW Client Catering Development Officer, Grainne Sheehy, attendees studied towards attaining the Chartered Institute for Environmental Health (CIEH) Level 2 Award in Food Safety.

The training covered concepts of food hygiene, food hazards and how they can be controlled. There was a final assessment where candidates were examined.

There were six attendees at the pilot training session, all of whom successfully passed to gain the Level 2 Award.

This course is aimed at teachers, resource, and extra provision providers and other school staff using food in the curriculum or otherwise.

Everyone who works with food has a special safeguarding responsibility to ensure the food they prepare or serve is safe to eat.

Further sessions are being planned. Please contact [Grainne.Sheehy@npw.uk.com](mailto:Grainne.Sheehy@npw.uk.com) to discuss arrangements for your school.

# St Bonaventure's scoop the news from the red carpet

**Year 9 St Bonaventure's student, Kelvin Paul, got the scoop from the premiere of the latest Marvel epic, Doctor Strange.**

During half term, Kelvin went to Westminster Abbey to interview stars Benedict Cumberbatch, Rachel McAdams and Tilda Swinton as well as other members of the cast and crew and crew on the red carpet.

Kelvin asked the actors detailed questions based on the film, including: just as Dr Strange does in the film, how did they leave their comfort zones?

Benedict Cumberbatch said: "People ask me what I have in common with my character and I

feel that's really it. I was having to do action hero stuff on a level I've never done before and wire-work and kung-fu moves and casting these spells with these amazing movements involving tutting with the fingers and these very delicate hand movements as well as the rest of the body posturing and I was learning that as much as my character was."

He also asked what celebrated neuro-surgeon Dr Strange would find if he explored their brains?

"There's lots of things I've lost in there so I'd like to get them back. So maybe he could help me with all my memories that I've lost," said Rachel McAdams, who plays Dr Christine Palmer in the film.

Kelvin said: "I had

so much fun and all the actors were really lovely with me and put me at ease which really helped settle my nerves. They didn't seem to mind I was only 13, they were really professional and answered all my questions and didn't patronise me which was wonderful. The film was great too. I'd definitely recommend it."

Kelvin managed the exclusive chats with the stars as part of his involvement with the BFI's Into Film. The education scheme delivers a wide range of activities to encourage watching, making and critical understanding of film for 5-19 year olds across the UK.

Kelvin won the October Jack Petchey Award for his participation in school life and as an ambassador for the school, exemplified by his performance at the *Doctor Strange* premier.

Head teacher Paul Halliwell said: "What a magnificent opportunity for a 13 year old. Most teens would have been star struck and extremely nervous to meet famous actors but it was testament to Kelvin that he remained professional throughout and was as cool as a cucumber. He deserves this award for representing our school so wonderfully."

## Newham beat national results in Religious Education

**The national average for A\*-C GCSE results in Religious Studies was just under 71%. In Newham 78% of students attained A\*-C in the subject, a full 7% higher.**

Claire Clinton, Newham's Religious

Education Advisor said: "We are so proud of our students who worked hard to gain these incredible results, and of course the many fantastic RE teachers who supported them. To be well above the national average in a subject is something for Newham to

celebrate."

The national average for A\*-A grade was 27%, which Newham also beat, gaining 29%. That means nearly one third of the 2,100 Newham students who took the exam got this top grade.

Mark helps schools and the people in them work smarter, transform teaching and learning, and save money into the bargain, and he does this by showing them how to embed the cloud invisibly into their school. Over the last ten years, he has worked with hundreds of schools, plus the clusters, trusts, alliances, federations and other groups which are the features of the new educational landscape, showing them how they can combine the three essential strands of Technology, Pedagogy and Engagement to transform themselves into nimble, adaptable learning organisations where technology is just a tool and only one element of a coherent strategy.

Mark is one of a handful of Google-Certified Innovators and Trainers in the UK, and in this workshop he will be showing you how you can leverage Google Apps for Education so that you, your colleagues and your students can acquire ninja skills to help you become more productive and more creative.

## Teaching Maths for Mastery In-depth

9<sup>th</sup> November - 11<sup>th</sup> November 2016

In-depth professional development course with our Singaporean practitioners - teaching maths for mastery using the Singaporean approach.

Nov

9

This three-day course will cover concrete-pictorial-abstract, effective use of questioning to encourage deep mathematical thinking, bar modelling and problem-solving.

Ofsted, National Centre for Excellence in the Teaching of Mathematics (NCETM) and the Department for Education (DfE) have all emphasised the value of the pedagogical and discovery learning nature of the Singapore approach to teaching maths.

With teaching methods that have been tried and tested over the last 30 years, and through the incorporation of key learning theories, such as Piaget, Dienes, Bruner, Skemp and Vygotsky Singapore has become a "laboratory of maths teaching" which has seen them rise to the top of the international rankings for TIMSS (Trends in International Mathematics and Science Study) and PISA (Programme for International Student Assessment) for mathematics.

This course is three days which allows time and space for planning and reflection on this revolutionary approach, providing you with the best chance to use this method successfully.

Our Singaporean experts will cover concrete-pictorial-abstract, effective use of questioning to encourage deep mathematical thinking, bar modelling and problem-solving.

At the end of the course you will understand the key learning principles behind the success of Singapore maths and the approach used within the Maths - No Problem! Programme.

### Course impact for teachers

Heads, Deputies, maths leads and senior team members will come away with a full understanding of the principles behind Singapore maths in order to train and support teachers back at school.

### Course impact for schools

Your school will benefit from having well trained staff with the in depth skills to support the implementation of a mastery teaching approach across the school.

### Who should attend

Recommended for anyone responsible for raising maths teaching standards, regardless of whether your school is using the Maths – No Problem! Materials. Ideal as a follow on to our Teaching for Mastery Essentials course. Previous exposure to the principles of Singapore maths or maths mastery is recommended. For teachers, mathematics subject leaders/department heads and senior leaders (year 1 to year 6). Those teaching early years and year 7 and 8 can benefit from this training, as well.

### Training consultant - Juliana Donna Loh

We're pleased to welcome Juliana Donna Loh as a new trainer to Maths - No Problem! Juliana has been an educator with the Ministry of Education, Singapore, for 38 years. She was the Head of the Mathematics Department in a Singapore Primary school for nine years before being identified to be and assuming the post of the first Master Teacher (Mathematics) in Singapore in 2002. Her experience included teacher training in the National Institute of Education in Singapore, syllabus review and professional development. Juliana has also authored a mathematics book "A handbook for Mathematics Teachers in Primary Schools" which was very well received both in Singapore and in other countries and co-authored two volumes of "Solve that problem" which gave insights on the various heuristics used in solving elementary mathematics problems.
